POST FRAME

THE WAY TO A BETTER BUILDING

Whether you are looking to place a utility building behind your home, build agricultural storage, or expand your commercial property, JD Metals can assist you in finding the right building for your needs.

JD Metals offers both traditional Post Frame buildings and premium Steel Frame structures for your selection. Both methods of construction are not only fast, energy efficient, and affordable, but beautiful as well.

Design Flexibility
Uncompromising Quality

The process for constructing our buildings is cost-efficient without sacrificing quality and durability. We use only high-grade lumber for our Post Frame buildings, and only premium steel for our steel structures. Combined with our quality roofing and wall materials, this will guarantee a building that will last for years to come.

RESIDENTIAL

AGRICULTURAL

STEEL FRAME

ENGINEERED TO LAST

JD Metals buildings can be easily customized to meet your individual building needs. We will work with you to accommodate your unique specifications for projects ranging from existing structure additions to new buildings.

Utilizing the latest engineering technology and concepts, our Post Frame and Steel Frame construction provides a visually appealing structure. Considerable engineering research ensures a code-compliant, reliable, and durable building regardless of the construction type chosen

Our premium steel structures are not the typical carport construction you see with most companies. Call or come by our showroom to see the difference before you purchase.

Whatever the Need

JD Metals provides the engineering, design, and materials to meet all your building specifications. We offer a wide variety of building designs, as well as an endless array of color combinations to provide that distinctive look you will enjoy for years to come. For all your residential, commercial, and agriculture building requirements, let us show you why a JD Metals building is the answer you've been looking for.
