Ref: Galvalume appearance and warranty

The uniform appearance of Galvalume coated panels cannot be guaranteed. The Galvalume coating is subject to variances in spangle from coil to coil which may result in a noticeable shade variation in installed panels. The Galvalume coated panels are also subject to differential weathering and may appear to be different shades due to this weathering characteristic.

We recommend that if a uniform visual appearance is required that the customer purchase a Weather XL pre-painted panel from us. Please note that shade variations in panels do not diminish the structural integrity of the panel or trim. These shade and spangle variations should be anticipated and are not a cause for rejection as stated in section 3h or our 25-year limited warranty.

These statements are inline with industry standards for Galvalume panels and trim. A copy of our 25-year limited warranty is available on our website or you may contact your sales rep to obtain a copy.
